HOLIDAY AT HOME  
IN A ROTOSPA

---

[www.rotospa.co.uk](http://www.rotospa.co.uk)

UK'S ONLY SPA  
MANUFACTURER

**SPEND TIME  
TOGETHER AND  
MAKE MEMORIES  
IN A ROTOSPA**

## Why RotoSpa?

Passionate about what we do, we're a family firm with nearly 20 years experience building multi-award winning spa pools that are durable, reliable and affordable.

We are the UK's only manufacturer of spa pools and are proud to be known as the nation's favourite home brand. Step into a RotoSpa and you'll understand why!

## BUY SMART, BUY BRITISH, BUY ROTOSPA!

## Our story...

RotoSpa is a family business that started in 2003 when a friend was looking for a hydrotherapy hot tub following a hip replacement. After searching the market and not finding any British made spas suitable for recuperation, we decided to develop and build our own!

From those humble beginnings and word of mouth recommendation, RotoSpa has made a huge splash in thousands of homes across the UK. And it's not just our customers who recognise a great product when they see one; our hydrotherapy spas have won awards and accolades from across the industry.

Our family firm may have got a little bigger, but every RotoSpa is still made right here in the UK. We take the same care and focus on our customers' specific needs as we did on the first spa we produced almost two decades ago.

## UNIQUE DESIGN!

RotoSpa's unique RotoTherm insulation significantly reduces heat loss and energy consumption to keep running costs low. Our polyethylene shell is extremely durable and virtually indestructible. It's structurally stronger than traditional acrylic spas and, other than a quick wash of the surfaces, requires zero maintenance.

Our mission is to be as environmentally friendly as possible and we're proud that RotoSpas have the smallest carbon footprint of any spa available in the UK.

## The UK's only spa pool manufacturer

Our spas are designed and built right here in the UK and we offer nationwide service and support.

**Back UK business and buy British.**

## Easy to install

Ingeniously designed to be portable, limited access is no problem with RotoSpa. With fuss-free installation, there's no need for a crane or other install costs.

Plus if you move, it's easy to take your RotoSpa with you.

**RotoSpa lasts a lifetime.**

## Low running costs

RotoSpas are amongst the most energy efficient spas on the market. Providing affordable year-round spa use, **you can enjoy your garden 365 days a year come rain, shine or snow!**

## Quality assured

Our one-piece shell and cabinet structure is so tough it comes with a lifetime warranty - **that's relaxation guaranteed.**

Photographs are for illustration purposes only.

## Touch of a button

You can adjust the temperature, turn blowers on, change speeds, activate LED lights and a whole lot more simply by using your spa remote control.

## SmartLINK WiFi and SpaLINK App

The SmartLINK WiFi module and SpaLINK app allow you to connect to and take control of your spa remotely from any location at any time. The SmartLINK module connects to any RotoSpa model and then uses your home WiFi network to facilitate communication between the app server and the spa.

The SpaLINK app becomes a mobile, wireless remote for your spa enabling complete control of all settings and accessories including pumps, blowers and LED lights.

Download the SpaLINK app from [App Store](#) or [GooglePlay](#).

## MySpaPool voice control

You can also control your spa using voice commands. Simply link your SpaLINK app to either Amazon Alexa or Google Assistant.

## Intelligent PowerSmart RotoSpa features

- RotoSpa's unique integrated dual sleep timers will provide you with 25-35% energy savings per day, compared to most other spas without this feature
- RotoSpa's dynamic thermal tuning achieves up to 15% reduction in energy usage
- RotoSpa's smart filtration saves up to 10% energy consumption
- RotoSpa's lockable touch pad
- Auto daily sanitize
- Remote WIFI access
- Heat pump ready meaning up to 75% energy saving.

## In the know

Keep informed about the health of your spa with status updates direct to your phone. Using the WiFi module and smart phone app, receive error alerts allowing you to react in real-time, ensuring the best possible spa experience. The app will clearly describe the issue and provide simple steps and solutions to resolve.

## Speedy support

Seek remote technical assistance and resolve issues quickly through the SmartLINK [SpaLINK global](#) module. Should you need help, simply activate the support PIN within the SpaLINK app. This allows RotoSpa remote access to the spa to swiftly check software settings, control and test accessories and run diagnostic checks.

# HEALTH BENEFITS OF YOUR ROTOSPA

## Life is demanding

As we all know, the stresses of everyday life can create issues such as anxiety, pain, fatigue, tiredness and mobility problems. One way to deal with this is through expensive therapy, medication – with possible side effects – and extensive exercise.

## Soak away the stresses instead

Ease daily stress, tension and anxiety with a regular soak session in the relaxing tranquillity of your own garden. There aren't many things in life that are enjoyable and give your wellbeing a boost at the same time!

## A natural painkiller

The human body is a superb machine, but like all machines it needs regular maintenance. Immersion in warm water is known for its pain-relieving and soothing properties. The Romans famously celebrated these health benefits with the introduction of 'bath houses' thousands of years ago.

Sinking into your RotoSpa releases endorphins - naturally occurring neurochemicals in the brain that have analgesic properties. The wonderfully warm, flowing water frees the strain on tense muscle fibres and sore joints and ligaments, allowing you to truly relax.

# MAKING TIME FOR YOU!

## Managing chronic health

The health benefits go beyond relieving sore, aching muscles. Spas can help prevent and manage chronic health conditions by lowering blood pressure and improving circulation. Raising the body temperature to 39.4°C increases the number of virus and bacteria fighting white blood cells three-fold. Most flu and cold viruses don't multiply above 38.6°C.

## Healthy heat

The warmed blood enlarges blood vessels, unclogs nasal passages and opens pores, helping rid the body of toxins. The circulation adjusts to the change with a slight increase in blood pressure, penetrating through to the deeper tissue and allowing the blood to carry more oxygen and nutrients. Your heart rate and respiration increases, helping to eliminate metabolic waste that collects in muscle tissue.

**Your immune system is stimulated, antibody production increases and pain melts away.**

## Hydromassage benefits

For thousands of years, hydrotherapy has been one of the safest and most natural ways to treat common ailments. Hydrotherapy uses three of nature's most powerful relief agents, heat, water and air, to invigorate and gently massage the body, naturally easing pain and relieving stress.

**Whilst our UK competitors merely offer bubbles, our unique design and strategically positioned jets mean ONLY a RotoSpa can give you a professional level of hydrotherapy.**

# INNOVATIVE JET SYSTEMS

For maximum performance, RotoSpa uses high-flow multiple distribution systems on all models. Unlike a single pipe that's linked from jet to jet, our system delivers water individually to each jet for a uniform pressure.

Each seating placement enjoys multiple hydromassage effects from state-of-the-art therapeutic, adjustable and rotating massage jets strategically positioned around the spa. These include lower, middle and upper back combinations, with neck and shoulder, leg and foot massage systems.

A flow diverter and multi nozzle 'master massage' jet on the Quatro model gives a powerful back massage without the need for bigger pumps and extra power. In addition, the turbo air injection system adds millions of tiny air bubbles directly into the water behind your back, around your legs and under your feet for a wonderfully invigorating massage experience.

## 1 Directional turbo hydro jet

This powerful jet introduces air straight into the water, for a superbly enriched full-body hydrotherapy massage.

## 2 Multipoint air injector jet

This fixed air turbo jet opens up the airline and supplies the champagne effect in the water, with millions of blissful little bubbles surrounding your entire body. This jet creates a soft touch massage for calming muscle relaxation.

## 3 Adjustable rotational hydro pulse jet

This rotational pulse jet moves the water in a circular motion, enabling fantastic massage to a wider area.

## 4 Directional hydro pulse jet

This jet offers targeted therapeutic hydromassage to those particular pressure points that need extra attention.

## 5 15 point ultra-master massage jet

The holes in this jet insert deliver the ultimate in hydromassage performance. The ultra-master jet stimulates a wide area, particularly the many pressure points in the lower back, giving a sensational massage.

\*Images for illustration purposes only, models and specifications subject to change.

## Everyone's included

Many manufacturers break up their spa pools into zones of only three or four massaging seats, leaving some spa users disappointed as they miss out on an active jet massage. That's not the case with RotoSpa! Our innovative 'All active' design ensures that every seat can have the ultimate in jetting massage, all at the same time.

## Tailored to you

With a RotoSpa, you are provided with a jet system that can be adjusted to suit your personal preferences. Whether you're looking for a powerful invigorating massage or deep relaxation, unique RotoSpa technology offers you a choice of spray widths, intensity and direction to create your perfect hydrotherapy session.

### What to think about when choosing the right RotoSpa model for you:

- How many jets do you want?
- What sort of massage do you want?
- What type of pressure do you like?

## Enjoy crystal clear water

The 'Ozone Sanitation Unit' is included as standard in all of our RotoSpa models. The ozone generator artificially generates a natural disinfectant gas that kills bacteria and acts as an oxidiser by removing bacterial debris left behind in the water. This clever little unit reduces the need for chemicals and is automatic, meaning less time preparing your spa and more time enjoying the beautifully clear water.

# DuraSpa range

The DuraSpa is our most luxurious and prestigious spa. If you're looking for maximum relaxation and enjoyment, our DuraSpa is perfect after a long day at work or busy session in the garden.

Modern, soft flowing lines with rounded corners and curved sides provide carefully contoured, full-depth seating. Relaxed lounge positions, padded headrests, a dedicated master seat, supporting armrests, an entry step that cleverly doubles as a small child seat and safety handrails all combine to give you an outstanding spa experience.

# DuoSpa range

The DuoSpa is our stylish, affordable two to three person spa. Compact design, flowing lines and a smooth finish ensure it will complement your lifestyle as well as your garden, patio, or balcony.

DuoSpa boasts two full-depth naturally reclining positions and a world-class hydrotherapy system. State-of-the-art adjustable therapeutic and rotating massage jets are strategically positioned to deliver fantastic targeted massage whilst the smart distribution system delivers water to each jet at a uniform pressure.

Massage choices include lower, middle and upper back combinations plus neck and shoulder and leg and foot massages. In addition, the optional turbo air injection system adds millions of tiny air bubbles into the water around your body, legs and even under your feet for a superbly invigorating massage experience.

**75 years**  
combined experience

“I suffer from chronic arthritis. The warm water helps me tremendously. Movements that I normally can't do, I'm able to do in the spa. It relieves the pain and swelling and loosens up the joints. The other benefit is social - when we have friends and family around, the spa is the first place they want to go!”

“We bought our tub almost 12 months ago. It's true to say it has changed our lives. Instead of sitting in of an evening and just watching TV, we now have the pleasure of relaxing in the tub and talking to each other. We both have very stressful jobs and the hot tub is the perfect way to relax. We use it most evenings and would never want to lose the experience. One of the best purchases we have made in the last 10 years.”

It's always great to get feedback. We're dedicated to evolving RotoSpa products in response to our customers' needs. We love carefully creating spas that our customers love using!  
**BUY SMART, BUY BRITISH, BUY ROTOSPA.**

“The jets are powerful, the filtration is brilliant and it's a breeze to clean and maintain. We really couldn't be happier and even though the weather is turning colder and winter is coming, we are still getting full use of our QuatroSpa - trust me it really heats up and maintains the temperature!”

“I use my spa most evenings before bedtime, it helps me relax after a long, stressful day. It's my quiet, peaceful time, massaging the day away.”
